

**GitHub Sites Peer Review & Editing for \_\_\_\_\_ (name)**

Is there a good **main page**, raising interest in both the *person* (as a potential employee...) and the *content* (evidence of an intellectual GIS maverick?)

Is it **functional** with working links and easy navigation?

Is it following an **honor code** of sharing, reproducibility, and attribution of work?

**Blog Posts:** note something to love, and something to work on:

**Gravity Model of Spatial Interaction:** is there a clear:

**Purpose:**

**Methodology / model:** (both data preparation and the gravity model)

Good **help documentation** in the model for its use?

Does the model **help** button **link** back to the GitHub site?

**Web map** of results:

Is it **functional**?

Does it have **title** and **attribution**?

Can anything be **improved**?

**Interpretation** of spatial interaction model **results/conclusions/implications**? e.g. interpretation of the parameters?
